PROFILE

I am a 3rd-year Software Engineering student at Fırat University, aiming to build a career in the field of software engineering. I am a motivated learner, eager to enhance my problem-solving skills and grow as a professional in the tech industry.

EDUCATION

Bachelor's Degree in Software Engineering   2022-2026

Firat University

Expected Graduation: June 2026

GPA: 3.44 / 4.00

PROJECTS

Student Dormitory Automation System   2024

Full-stack Web Development

- Developed a student dormitory automation system as part of the Database Management Systems course. I designed and implemented the database tables, ensured accurate data entry, and enabled efficient data retrieval.
- Technologies used: HTML, CSS, JavaScript (front-end); PHP and MySQL (back-end)

Real Estate Portal Web Application   2025

Full-stack Web Development

- A feature-rich real estate portal designed to enhance the property search experience through an intuitive interface and advanced filtering options.
- Technologies used:
  Backend: Laravel, MySQL
  Frontend: HTML, Tailwind CSS, JavaScript, jQuery, Flowbite
  Map Integration: Google Maps API
  FileUpload: Filepond
